The article-by-article commentary on Europe's new landmark legislation for the digital age.

This book explains,

- How digital gatekeepers and their core platform services are designated,
- What the obligations of gatekeepers are and how these obligations must be implemented,
- What rights business users of platforms have; and
- How users, gatekeepers, agencies and courts deal with breaches of the law.

The Digital Markets Act (DMA) brings many new rules for large platforms. It is the EU's most innovative approach to making markets more contestable and fairer. The many detailed obligations must be complied with by gatekeepers. They affect business users of platforms as well as end users.

The advantages at a glance:

This article-by-article commentary provides a detailed analysis of all the rules in the DMA. It is a very useful guide

for practitioners, in-house counsel, lawyers in associations, policy makers and academics in the field.

The editor:

Rupprecht Podszun, Professor at the University of Düsseldorf, an expert in competition law and digital regulation. He was an advisor during the legislative process of the DMA.
